MIRO-CLE METAL WORKER!

Walking by Darcy Miro's shop on Bedford Street, one can't help but to be captivated by the display of organically shaped metal works of art behind the storefront glass. As the gracefully twisted and textured metals softly reflect the sunlight, they initially leave you pondering over what they actually are; sculptures?... Jewelry?...hmm. OK, OK. So I walked in the store to get the 411. They are everything one expects; Jewelry, sculptures, fine art, and home decor!

Darcy Miro

Darcy Miro Metal Shop is home to amazing pieces of 18-karat gold and sterling silver rings, cuffs, bracelets, necklaces, and home decor such as mirrors, tiles, and wall paper (wall metal decor). Each hand made sculpture is the work of Darcy Miro. Her manipulation of molded metals is completely brilliant and meticulous. Each one of a kind creation embodies the perfect balance of texture and smoothness, allowing a sense of movement, creating a kind of living quality. Alright, I can write a book on this stuff, but I won't, so you just have to check out the website or visit her shop. Organic, fashionable, and contemporary, fused by miracle artistry. Darcy Miro is just that...A Miracle Worker!
